UNITED STATES DISTRICT COURT
SOUTHERN DISTRICT OF NEW YORK

BIOSAFE-ONE, INC., d/b/a
WWW.BIOSAFEONE.COM
and CHRISTOPHER JORGENSEN,

X

Plaintiffs,

- against -

Case No.: 07-CV-6764

ROBERT HAWS; BRAD SKIERKOWSKI;
NEWTECHBIO, USA a/k/a BRAD & COMPANY,
INC., d/b/a WWW.NEWTECHBIO.COM;
WWW.JUMBOMORTGAGES101.COM
a/k/a JUMBOMORTGAGES.NET; and
BCI FUNDING GROUP,

AFFIDAVIT OF LOUIS
FLANIGAN

Defendants.

X

State of New York)
)
County of Brooklyn,)

ss:

LOUIS FLANIGAN, being duly sworn, deposes and says:

1. I reside in Brooklyn, New York.
2. I am a graphic designer with extensive professional graphic design experience. I have been a graphic designer since [year].
4. In or about July, 2002, Christopher Jorgensen hired me to create, as a work made for hire, a graphic design of a septic tank, drainfield and other elements.
5. At that time, Christopher Jorgensen provided me with a general sketch of a septic tank diagram that he informed me he generated by hand.
6. Christopher Jorgensen and I had numerous conversations about the septic tank diagram from July, 2002 to November, 2002: During that time I revised my designs pursuant to those conversations with Christopher Jorgensen.

6. I created the house and the underground drawings of the septic tank, distribution box and drainfield. I added the colors and contrast. The house which I also created was mistakenly kept in the septic tank diagram even though I had intended to remove it in the final design that I submitted to Christopher Jorgensen. I completed the design of the septic tank and other elements in or about November, 2002.

5. The design, annexed to this Affidavit as Exhibit 1, featuring a septic tank, drainfield and other design elements, and now appearing on the website, www.biosafeone.com, is the design that is my original creation which I drew from my own inspiration without deriving it from any prior drawing or prior design, other than from the general sketch of a septic tank diagram from Christopher Jorgensen as specified above.

6. The septic tank designs in Exhibit 2 annexed to this Affidavit appear to be exact duplicates of the design I had created for Christopher Jorgensen.

7. Defendants' septic tank design, compared to plaintiffs' septic tank design, in Exhibit 3 annexed to this Affidavit appears to simply make minor modifications including contrast and color. Defendants repeat the same mistake from my design by including the house.

A handwritten signature in black ink, appearing to read 'Louis Flanigan', with a long horizontal stroke extending to the right.

Louis Flanigan

PLAINTIFFS' SEPTIC TANK DESIGN

oxygen surviving) bacteria conveniently freeze-dried on bran. We direct you to flush the contents of one bag down your commode once a month. **B.O.S.S** aerobic bacteria come to life when they touch water and digest the top layer of the cesspool or septic tank called the "scum" layer (fats, soaps). The more difficult to cultivate anaerobic bacteria in **B.O.S.S** digest the lower heavier solid or "sludge" layer (see diagram below of a septic system).

Diagram of a septic system

Sewage digesting bacteria in **B.O.S.S** double every 20 minutes and replenish bacteria in the tank that have been destroyed by everyday use of soaps and cleaners. Through its superior enzymatic activity against specific substrates such as lipase (grease), protease (protein), cellulase (mold, vegetables and paper) and amylase (starch), **B.O.S.S** digests and dissolves organic matter, breaking down its molecular structure and recycles water, minerals and carbon dioxide back into the environment.

B.O.S.S digests up to 100 pounds of sludge and scum in a 24-hour period. With such a high digestion rate, **B.O.S.S** reduces the depth of sewage in the tank and increases the overall capacity of your tank. This process lowers the pressure in the septic tank which allows proper digestion to take place, making sure that sludge or scum does not flow into the drainfield where it clogs the drainfield pipes and soil. **B.O.S.S** reduces strain on your whole system, and increases system longevity.

According to the EPA, trouble signs in your system are difficult to detect and if your system is not properly maintained, it will eventually fail. Most systems fail due to problems in the drainfield where the drain field lines and soil gets clogged with biomat (black tar-like sewage residue) and sewage. The sewage water has no place to go. Waste is then forced back into the tank, up through your pipes and into your home! When there is not enough bacteria in the tank, proper digestion cannot take place. You need to add bacteria to your system to avoid sewage accumulation in your tank and field.

Additionally, sludge buildup results in loss of $\frac{1}{4}$ " - $\frac{1}{2}$ " of space every 4 years along the walls of your pipes, limiting the amount and rate of sewage flowing through your system. Using **B.O.S.S** on a monthly basis assures that buildup does not occur.

The bacterial cultures introduced by **B.O.S.S** are laboratory produced and tested. We guarantee to be non-disease causing and non-hazardous. The specific types and volume of bacterial strains developed by our laboratories, especially the anaerobic cultures necessary to combat difficult wastes such as grease and paper have been developed over 56 years, the most effective means of dissolving wastes available.

perforated pipes. These perforated pipes then deliver the liquid to a large soil surface area, called a leach field, or absorption field, for absorption. The soil also acts as a filter to remove any small amounts of solids that may be carried along with the liquid. The sludge in the bottom of the tank must be periodically pumped out and properly disposed of.

There are other kinds of systems for special situations, but the septic tank and leach field is the most widely used system in our area. The following discussion concentrates on this type of system.

Where are These Components Located?

The concrete, or sometimes steel, septic tank is buried in the ground, usually a minimum of 10 feet from the house. The top of the tank is usually about one foot below the soil surface so it can be periodically opened for inspection and pumping. If you do not know for sure where the tank is located, the first step is to locate where the house sewer pipe leaves the house. In a house with a basement, this is where the pipe passes through the

Competitive Comparison

Other brands charge retail prices (that means 2-3 times the mark up value) for ineffective products that are too weak to fully digest and eliminate sewage. We ship you manufacturer direct, an industrial strength product with a proven track record, so you pay wholesale price for a treatment that really works. Take a look at our comparison chart that shows the price, and quantity of other septic products, and notice the overall value.

Stop paying retail price for weaker less effective additives or products!

WE HAVE THE SOLUTION!
BIO-SAFE ONE
SEPTIC SOLUTION!
(B.O.S.S.)!

Take charge of your septic system by maintaining it! You need to maintain your system! If you fail to maintain your septic system, it can cost thousands of dollars to replace it!

Product Name	Average Price: 1 Month Supply	3 Year Supply	Money Saved compared to Bio-Safe One	Experience and Company History	End Result Product Comparison
Rid-X	\$9.48	\$341.28	\$112.28	40 Years	4.5 million times weaker. More expensive. Less effective.
Bio-Safe One Septic Solution	\$4.38 (See Below)	\$199.00	\$175 (Price Range of Pump-out) or \$5,000 (System Replacement)	Over 53 years Major success: Clean up of 1989 Exxon Valdez Oil Spill	Bio-Safe One saves you the cost of pump-outs and system replacement
Septic Helper	\$2.48	\$179 for a 6 Year Supply	None, see Comparison	Leading Manufacturer Worldwide. In/out of business due to numerous Attorney General complaints. Product resembles sawdust.	Strength: Bacteria counts in the billions per gram. The shelf life of powder bacteria does not last 6 years.
Bio Clean	\$6.20	\$223.44	None, see comparison	In/out of business.	Excessive amount of bacteria needed suggests that the bacterial count is significantly low.

** NOTE: Calculation for 1 month supply of Bio-Safe is based on free shipping and handling, as well as 6 free months added to every order!*

These savings include **FREE** shipping. We send you a 3.5 year supply in one shipment, so you avoid the cost of traveling back and forth to the store, along with the taxes you would have to pay, bringing more value to you, the end user.

To order, Click Here!

The Bio-Safe One Septic Solution has the strongest formula of bacteria and enzymes on the market. Furthermore, B.O.S.S bacteria are non-oxygen surviving, difficult and expensive to produce, which clean the toxic sludge deep inside your septic tank. Bacteria counts in other competitors range in the millions, while our product has 4.5 billion active bacteria per gram. This means that the Bio-Safe One Septic Solution degrades waste faster, and prevents expensive emergencies and unnecessary pumping costs!

To order, Click Here!

Other reasons to buy Bio-Safe One Septic Solution:

- Experience - Over 56 years in Commercial and Industrial markets.
- Wholesale price- direct from the manufacturer
- Guarantee of authenticity of our Industrial strength, laboratory tested, bacteria and enzymes. 4.5 Billion per gram.
- 24/7 day a week, toll free #, unlimited technical support/customer service to help you with any of your needs.
- Payment Plans available upon request for customers who require more time. (No Credit Check)

Our product originated from commercial use in industries with

heavy grease use that required a strong enough treatment that could clean out grease traps, septic systems and eliminate tough problems such as backups, overflows, odors and unnecessary pump-outs. Unlike other competitors such as Rid x or Septic Helper, we have a prominent history not based on commercial advertising. Our product gained its popularity and success in helping with the largest clean-up in America's history, the enormous Exxon Valdez oil spill in 1989. Products like Rid-x: are not lab-cultivated, are "yeast-based" bacteria, lack essential other neutralizing ingredients; the bacteria per gram count is millions of times weaker than our product (which is as they advertise "in the millions" as compared with our product which has billions per gram - much stronger!). Other products can be destroyed by use of household soaps and cleaners, whereas, Bio-Safe One Septic Solution is designed to digest and neutralize these common household additives.

In addition to this, you as a customer will be saving over 50% in price by buying direct from us the manufacturer whereas with Rid-x or septic helper, you must pay the retail price for a lesser supply (they want you to keep coming back to the store every month!).

Bio-Safe One Septic Solution degrades waste faster, prevents expensive emergencies, and prevents having to pay for unnecessary pumping costs! Bio-Safe One Septic Solution: The solution to all of your septic needs!

Re: DMCA Infringement Notice
Domain Name: <www.newtechbio.com>
Our File Number: 7017.001

Dear Mr. Lessler:

Please be advised that this office represents the interests of Add2Net, Inc. dba Lunarpages with respect to the above referenced matter. We ask that you kindly direct all further communications regarding this matter directly to this office.

We are in receipt of your letter to our client dated August 27, 2007. This shall respond thereto.

As you are aware, our client was provided with a properly formatted Digital Millennium Copyright Act (the "Act") notice pursuant to 18 U.S.C. §512(c)(3). Our client responded by expeditiously moving to remove, or disable access to, the material that was claimed to be infringing.

Your client then provided this office with a counter-notice under 18 U.S.C. §512(g)(2)(B). However, this notice was deficient in that it did not contain the required elements to be effective.

Furthermore, our client has been notified of the existence of a lawsuit dealing with the issues presented in the original notice. Therefore, at this time even if our client were to receive a properly formatted counter-notice under the Act, our client would be prevented from taking any further action regarding access to the subject website absent a specific court order directing our client's actions.

Your letter indicates that the court in your case refused an initial injunction. This is insufficient, however, for our client to take any action under the act because the site

Arthur L. Lessler
August 28, 2007
Page 2 of 2

was disabled pursuant to our client's obligations under the Act. If you should secure an order from the court directing our client to re-activate the site our client will comply in that regard. Under no circumstances will our client become involved in editing the site or making any judgment as to whether your client has done so sufficiently. Such an order should be drafted specifically ordering our client to reactivate the site. You may provide such order directly to this office.

Once you secure a proper order from the court we will endeavor to comply expeditiously. We trust that this fully addresses your concerns.

Very Truly Yours,

CHAPMAN, GLUCKSMAN & DEAN

Date: August 27, 2007 5:09:47 PM EDT
To: OWilkens@nyc.rr.com
Cc: vik@pawarlaw.com

Dear Ms. Wilkens:

Last night you sent a DMCA notice letter to hosting company godaddy.com which falsely states that my client's website cloggedrainfield.com "has infringed on the Owner's exclusive copyright by having created and distributed unauthorized copies and unauthorized derivative works of the Bio-Safe One Website".

Unless within 24 hours you either (1) point out to me exactly what significant text or graphics on the cloggedrainfield.com website is a copy of what protected material on the Biosafe-One website or (2) withdraw your DMCA notice letter, I will file a third party complaint against you in the aforementioned action for damages and injunctive relief for intentional interference with my client's contract rights and intentional interference with their prospective economic advantage.

Re: Biosafe-One, Inc. et. al. v. Hawks et al. - USDC-NY Case No. 07-6764

Dear Mr. Lessler:

I have received your intemperate email dated August 27, 2007.

Dealing with the substance of your email first, the www.cloggedrainfield.com website is substantially similar to www.newtechbio.com website, save for the name of the website, the substitution of "NT-Max" for "NewTech" and other minor modifications. While either website continues to infringe on my client's exclusive copyright to the "biosafeone.com" website, the Digital Millenium Copyright Act ("DMCA") provides appropriate safeguards, of which my client has availed itself, unless the court orders otherwise.

Information regarding the copies and derivative works created by your clients in violation of my client's copyright in the "biosafeone.com" website will be provided and is forthcoming.

The balance of your email is a transparent effort to deprive my clients of their choice of counsel by creating a fictitious conflict of interest, and to personalize the disputes between our respective clients. Insofar as you or your clients are attempting or intending to interfere with the defense of this case, as well as my client's rights under the DMCA, Rule 11 sanctions will be sought.

Very Truly Yours,

Odette J. Wilkens

From: support@lunarpages.com
Subject: Re: [Lunarpages Helpdesk] [RXHS3552BBWK] copyright concerns
Date: August 22, 2007 5:30:04 PM EDT
To: OWILKENS@NYC.RR.COM

Dear owilkens,

---- TECH RESPONSE STARTS HERE ----

Hello,

This will address the latest status of your recent complaint to Lunarpages regarding an alleged copyright infringement. Please recall that Lunarpages has no involvement with or control over the web site or materials in question and we continue to encourage you to contact the owner of the web site directly with regard to your dispute.

Please be advised that we have now received a proper counter claim notice from the operator which also meets the requirements of the Digital Millennium Copyright Act. (DMCA) 17 U.S.C. 512 (c)(3). Under the provisions of that act we are now required to activate the site unless we are provided with notice from you that you have actually filed a lawsuit seeking to enjoin the site operator from infringing the copyright for the material on the site. Upon receiving notice that you have filed such a lawsuit the deactivation will remain in effect until such time as there is a further order from that court requiring otherwise. This will conclude our involvement as there is no other action we are permitted to take.

Included herewith is a full and complete copy of the counter claim notice received from the operator of the web site. Lunarpages takes copyright issues very seriously and has implemented policies and procedures specifically to deal with claims such as yours pursuant to applicable law so as to protect the rights of all parties involved. We have now fully complied with all elements of the act and as such Lunarpages falls within the Safe Harbor Provisions of the DMCA. In doing so we have made no determination as to any validity of your claim or any lack thereof.

"I swear under penalty of perjury, that any potentially copyright protected material, past or present, on my website located at www.newtechbio.com has been fully removed and any further claims of copyright infringement which may arise, are completely unjustified and false. I am aware of the federal complaint and am fully in compliance with all copyright aspects of the site. This case is ongoing and is projected to rule in our favor being that any past accidental copyright infringement has been stricken from the entire domain.

Thank you."

Of course if you should have any further questions, comments or concerns regarding this matter please do not hesitate to let us know.

Very truly yours,
Lunarpages Legal

Shawn Williams
Lunarpages Abuse Department Representative

owilkens@nyc.rr.com

Dear Mr. Ben Butler,

Thank you for contacting me regarding the "copyright infringement claim" against my websites www.cloggedrainfield.com.

I swear, under penalty of perjury, that any potential copyright protected material, on my website located at www.cloggedrainfield.com, contains no material within that is alleged to contain copyright infringement by the accuser. Any and all further claims of copyright infringement, which may arise, are completely unjustified and false. I am aware of the federal complaint against www.newtechbio.com only, and am fully in compliance with all copyright aspects of the site. The Federal Honorable Judge Chin ruled against the plaintiff this day at approximately 11:00 a.m. this day August 27, 2007 in our favor against the motion to shut down the web site.

This case is ongoing and is projected to rule completely in our favor being that any past accidental copyright infringement concerning www.newtechbio.com only has been stricken from the entire domain.

Thank you again for the information and please contact me at 570-499-9610 if the contents of this letter do not contain all the required information that www.godaddy.com is requesting in order to unlock the site.

Sincerely,
Bradley Skierkowski
CEO www.cloggedrainfield.com www.newtechbio.com

About hostingpanama™

9 years of experience, over 7,000 customers world wide, industry leading infrastructure, and lot's of hard work, have made us into what we are today:

*The world's most important and experienced "**Offshore hosting**" firm.*

HostingPanama(TM) is an international, secure and Offshore Hosting provider, with 2 main datacenters located in the Republic of Panama. Our group of companies and franchises world wide have been in business since 1999. We offer 24/7 technical support and a multilingual staff. Throughout these years we have been dedicated to offer cost-effective offshore, private and secure hosting solutions to our customers and have made strong alliances and business partnerships with companies like, Microsoft, SWSOFT, MX Logic, MaLabs, Cable & Wireless, Tucows and several others. With the pass of time, HostingPanama has earned international recognition and has won several Latin American awards.

Among our broad range of products, we cover the main 4 areas of hosting: Shared hosting, Virtual Private Servers, Dedicated servers and Colocation services. We also provide managed services, monitoring, domain name registration and a variety of add-on solutions such as security services and SSL certificates.

Our clients entrust us with their operations, and come from diverse backgrounds, from the USA and Canada to England, Italy, China, the Bahamas, Australia, Germany, Italy, Spain, France and many other countries around the Globe.

If you have any further questions about us, please feel free to **contact us** for more information.
